# MODULAR WALL SYSTEMS

prefab construction

## ARCHITECTURAL STYLES

*"For the architect, designer, shop-fitter or DIY homeowner, our recycled wood feature wall systems forge a new path in the use of recycled timber in contemporary design."*

## **DISTINCTIVE & UNIQUE**

Reclaimed Australian Timber transformed into a modular system for consistency of sizing and ease of installation, resulting in beautiful, creative and sustainable living and working spaces.

## **SIMPLE SYSTEM**

Our modular system has simplified both the specifying and installation process. It is fast to install, drastically reducing onsite labour, skill requirements, time and mess. Perfect for both commercial and residential applications, it brings a modern, industrial, rustic or organic feel to any space.

## **FRESH & INVENTIVE**

This innovative feature wall system combines the bespoke qualities of beautiful reclaimed Australian timbers with the convenience of prefab construction and modern flat pack design. Locally sourced, remilled and reinvented.

modular decking

# HARDWOOD DECK TILES

prefab construction

## COMPLETE DIY MAKEOVERS

### SO EASY TO INSTALL

Our deck tiles transform outdoor areas easily and instantly, without the need for tools, tradesmen, mess or fuss. There is arguably no better way to create resort-style outdoor living than with a hardwood decking make-over.

### ROOFTOPS & BALCONIES

Our deck tiles are the perfect solution for rooftops and balconies as they do not impact the waterproofing membrane. Unlike traditional decking, the tiles simply float over the substructure, leaving the membrane perfectly in tact.

### A "FLOATING" DECK

Specifically designed for outdoor areas, our deck tiles can be laid directly on any existing solid structure. The connectors raise the tiles off the ground to allow for drainage and aeration. Locally made with 100% Australian hardwood.

*"I just wanted to tell you that we are absolutely thrilled with the decking!! We put it together in about 2-3 hours, and it looks fabulous. We couldn't be happier."*

recycled railway sleepers

# SLEEPER DECKING

bold and beautiful

## RAW NATURAL ELEMENTS

*"Modern, rustic style has a design emphasis on rugged, natural beauty. It embraces nature inspired textures, simple and earthy colors, and ultimately an unpretentious, organic warmth."*

## CONTEMPORARY RUSTIC STYLE

The use of railway sleepers for decking creates an unrivaled style of organic charm. It's an exciting product with huge scope for creativity and individualistic design in both residential and commercial applications.

## NATURAL & MAN-MADE BEAUTY

The holes from the railway spikes are characteristic of the timbers' colourful past and the wide, robust boards command a bold and earthy respect. They boast some of Australia's most magnificent and hard-wearing timbers such as ironbark, tallowwood and turpentine.

## HIGH FEATURE BOARDS

Arguably one of the most interesting products we stock is our "second grade" sleeper decking.

The holes, cracks and splits that make them unsuitable for decking, make them intriguing to look at and make for impressive feature walls and screens.

reclaimed hardwood

# RECYCLED FLOORING

remilled as new

## REMILLED AND REDEFINED

## SUSTAINABLE & STUNNING

As well as the obvious environmental advantages of using recycled flooring, the physical and aesthetic aspects shine over those of new timbers. The combination of both natural and man-made features in the boards is simply stunning.

*"Reclaimed timber is on trend, rapidly becoming THE buzzword in design. Where timber flooring is concerned, it's with good reason!"*

## MAKING OLD NEW

Our recycled flooring is milled down from larger recycled or salvaged timbers sourced from all kinds of old buildings and structures. It is then "de-metaled" and machined with the precision of new floorboards to ensure strong and snug installations, or sawn and distressed to maintain the aged features of the boards.

## AUSTRALIAN BEAUTIES

Separated into reds, creams or mixed hardwood floorboards, the species used in our hardwood timber flooring blends include much loved timbers such as blackbutt, tallowwood, ironbark, blue gum and spotted gum to name just a few.
